No 1131

MLH-83-1

Deputy Commissioner's Office
Mysore District,
Dated Mysore 17th May 1884

To,

The Secretary to the Dewan
of Mysore.

Sir,

I have the honor to forward the information and orders of the Dewan the whole of the proceedings received yesterday, of the select Committee appointed for the purpose of consider the improved sanitation and drains of the Fort.

2. The whole question is so fully state in the reports of the members that I need hardly repeat it: I would at the same time observe that the improvements suggested regarding the straight entrance into the Fort from the north and south will interfere with the outer fortifications, and if His Highness has no objection to same, it will be a very great improv

and I would beg that early orders
may be obtained on the subject

I have the honor to be,
Sir,
Your most obedt Servant,

Superintendent,
Mysore District.

Proceedings of the Durbar
of Mysore

Read:-

Letter No. 104 of the 17th May 1884 from the Dy. Commr. and Munici-pal President, Mysore forwarding for orders a scheme for the better sanitation & drainage of the Fort of Mysore

ML 11-83-2

GT 11-83-2

No 1348-50 of 26.5.84.
75

Order thereon —

In the above papers are recorded the views of the Municipal Com-missioners on the follow-ing subjects -

1st The Sewerage of the Palace and Fort

2nd " The opening out of a straight approach to the North gate.

3rd " The opening out of a straight approach to the South gate

4th. The removal of all small houses and hovels situated both to the north and south of the Palace, and of all houses, other than really good ones, within a radius of 150 feet of the Palace, the space thus being cleared ~~to be~~ laid out as gardens.

5th. The Palace to be supplied with good water from the Kookerhalli tank

2. In considering the first of these subjects, viz, the Sewerage of the Fort and Palace, the Dewan observes that the Committee have decided on adopting open V shaped drains in streets, while they

recommend the more
Scientific and modern
contrivances of glazed
Stoneware pipes, trap
Syphons &c for the house
the Secondary, the main
and the Outfall Sewer
The reason for this de-
-parture from recognized
principles of Sewerage is
not apparent from the
reports, nor is it shewn
how the two systems,
i.e of open drains and
Sewer pipes are to be
combined, Since the
Committee have accept-
ed the leading feature
of the proposed works
to be, — the Separation
of Soiled house water
from Storm water. — The
V Shaped drains are

efficient for the purpose of surface drainage, but they are held to be very inappropriate for Sewerage The Board will therefore be requested to re-consider the matter and to submit revised proposals with due regard to the necessity of keeping storm water in the open side drains separate from Sewerage.

3. The second and third items of improvement will be considered when the Dewan next visits Mysore.

4 The improvement of the immediate vicinity of the Palace and the removal of huts and hovels in the neighbour-

.hood

-hood as proposed are approved as far as they go. This question has to be considered also in its relation to the drainage of the Fort. There is no plan of the Fort now before the Dewan, and he is therefore not able clearly to indicate what is required in this direction. A map shewing the drainage of the Fort was prepared by the Executive Engineer Bijapore in or about 1877-78, and the Executive Engineer will be requested to submit a copy thereof. In the meantime, the Dewan is of opinion that the clearings round within the Fort are o

follows in the order
of their importance:

(1) The small houses occupied by Gollars, washermen, tailors and others, on the north of the Palace, between the wall of the Palace Salagaré and the North West Rampart of the Fort

(2) The houses on the South west of Karikal Tolli, as was pointed out to the Palace Asstt Commissioner last year.

(3) The small detached houses in the vicinity of Jankasale, required to complete ~~the scheme for~~ having open laid out grounds in that locality

(4) The bigger houses on the North of the Palace

Salgeré

Salgere wall – most of
the houses of value in
that locality belonging
to Dinchandra and Nius
are too near the Palace
wall to be retained –
another large house
(Sukshe Bhadra's) is also
in an objectionable
position, being too near
the Rampart wall.
These houses have all
to be removed eventually.
The only other large house
between the Palace wall
and the Fort North west
Rampart is Venkatappays
This may for the present
remain untouched, as
other arrangements can
hereafter be made by the
Palace in regard to it

5. The President will be
requested to frame Estimates

of the cost of buying
the houses above referred to
In the case of the smaller
houses, huts, &c, it may
perhaps be desirable to
build for the owners a
sheet of houses in some
convenient locality such
as the vacant space on
the west of the North
Entrance into the Town
This may be somewhat
costly, but with due
precautions for economy,
such an arrangement need
not cost much more than
the buying up of the houses
It certainly has the ad-
-vantage of preventing
all inconvenience to
the poorer house owners.
The owners of the larger
houses [illegible]
-[illegible]
soon) must be paid

P.

the price of these houses
It is of the first importa
that before the houses ar
removed a suitable sit
should be selected and th
owners required to build
new houses therein, if the
at all wish to build —
another precaution very
much required is to pro
hibit absolutely the
building of new houses
within the Fort.

6 With such clearings th
Fort drainage scheme will be grea
simplified.

7. It is notorious that t
quality of the Karanja ta
water has greatly deteri
rated since the drainag
of the town was led int
it one years ago. From the main dra
of the town passing thro
the Deputy Commissioner
Office Compound a bran
on a somewhat hea

level is led off on one of the feeders of the Karanji Tank. This appears to be a very undesirable arrangement, and the Board will be requested to give their very early attention to it. A well below the Karanji Tank now used by Europeans and Eurasians contains pure water. A sweet well in the same locality should be constructed and reserved for the use of Caste people only. The wells in the neighbourhood give a never failing supply of water and must therefore be a great boon to the people throughout the year especially

Especially during the dry weather. The proposal to supply the Palace with Kukerhalle water is ap-proved. An Estimate of cost should be submitted in due course.

8. Pending the submission of the information herein called for, Mr Lee will at once ~~Set~~ set about pre-paring the Scheme for thoroughly sewering and drawing the Palace. The Suggestions made in Para-17, Sections a, b, f, g, h, i, k, l, m, and o, of Mr Lees report and approved of by the Committee, may be carried out, after the Proc of the Select Committee have been confirmed by the Commissioners.

9. The funds required for the removal of houses within the Fort, for the Systems of drainage Water Supply, will be fra

out of Provincial Revenue,
when ~~Conservation~~ comprehensive schemes
for carrying out the res-
-pective works are care-
-fully matured by the Board and
finally approved & sanctioned by Govt.
- large immediate grants
may not be possible, but
if the future schemes are ~~at~~
~~once prepared and~~ ap-
proved once for all, such money
as Govt. can spare —
annually should be
spent towards them
and not, as in the
past, in sporadic
efforts at remedying
defects which casually
attract attention.

Has the honor to bring to notice that the Dewan the morning personally ordered the following works to be carried out in the Fort.

1. The temple at the south gate to be set back 8 feet in line with the Rampart wall at the back.

2. The removal of the small Maramma's temple in the Street opposite Raja urs' house to more convenient Situation within the Fort.

Arrangements for carrying out the above work.

being made. The cost will be about 1000 Rs, and as the Municipal Funds cannot bear this charge the Sanction of Government should be obtained for debiting the same to the amount already spent in the purchase and removal of houses in the Fort, under Parag 7 of Proceedings of Dewan No: 1348-50/75 dated 26th May 1882.

Offl Memorandum

Special Improvements in the Mysore City have often been hampered by delay in payment of Compensation for properties acquired for the purpose, from private owners. Therefore, to facilitate prompt settlement of Compensation cases, the following procedure is prescribed tentatively -

(a) The Executive Engineer, Special Improvements Division, the Palace Comptroller and the President of the Mysore Municipality (in his absence the Vice Presidt

President) shall form themselves into a Committee for the purpose.

(b) The Committee shall fix what, in their opinion, may be reasonable compensation for properties required, and when this is accepted, shall, in anticipation of the formal sanction of Govt, pay the amount at once, from funds at their disposal, or by drawing the necessary funds as advance from the Treasury, and take possession of the properties in question.

(c)

(c) The compensation statement signed by the Members of the Committee, will then be forwarded in due course, for the necessary sanctions,

(d) The Deputy Commissioners, Mysore Dists will instruct the Treasury Officers to pay and debit as "advances to be adjusted," amounts which may be required by the Committee, on their requisition, [redacted].
